MEMORANDUM FOR THE RECORD

SUBJECT: Senior Staff Meeting, 27 April 1964

1. There were no visiting chiefs of station present at the meeting.

2. Mr. Cooper mentioned that there are currently some trouble spots on which the White House is keeping a close watch (e. g. Vietnam, Cyprus, Laos). There are also areas which are being watched for their longer range trouble potential [redacted] South Africa).

25X1

In regard to National Policy Papers, Mr. Cooper mentioned there are now 20 in train with only one fully approved--Ethopia. Mr. Cooper gave as his opinion that the administration will find that the NPPs are too cumbersome and bureaucratic and that in a few months Rostow or his successor may see fit to junk the concept. The CIA role in the production is a modest one so the Agency will not be seriously affected by any such decision.

3. Mr. Houston reported that there is nothing new on Early Retirement Legislation or the Executive Pay Bill. He reminded the staff that all Agency employees should be mindful of the Hatch check.

4. Mr. King discussed the upward trend of physical security violations during the last few years. He said that this trend can be checked if supervisors will indoctrinate employees, establish good after hour checks, and continue to make certain that correct procedures are followed.
